Personal Statement

Business and Management graduate currently working as an Account Executive at ELIS. Looking to move into data analysis. Experienced with working with data extraction and storing through PowerBI and Excel. Worked on implementing KPI reports and working towards them alongside focusing on customers financial data and analysis. Using data analysis to support business decisions.

Work History

ELIS, Lutterworth

August 2025 - Current

Account Executive

- Extracted customers financial data, analysed the data and created a full financial report to provide to the customer. Supported business decisions based on analytical data for example using account data, pricing and budgets to provide customer quotations for new products.
- Created and formatted Excel spreadsheets to provide businesses with their financial account's situations. Created detailed graphs to demonstrate inserted analytical data for customers to showcase their current wash cycles.
- Extract and export my own KPI performance to analyse if I'm above/below my target and use it to evaluate what areas need improving.
- Accumulated financial data and discrepancies to calculate credit notes, balance of contracts and residual values for customers. Used financial data presented on Excel to support credit control activities.
- Extracted customer data through internal systems and databases to analyse patterns on Excel

Aston University, Birmingham

June 2024 - August 2024

Student Project Officer

- Collected data from students to provide them with the best events suited to the average preferences. Ran many questionnaires to accumulate as much accurate data as possible.
- Created Excel spreadsheets to support the budgeting of fresher's events.

Showsec, Birmingham

Dec 2021 – Jan 2023

Events Steward

- Collected and handled data accurately, ensuring compliance with data protection requirements
- Communicated professionally with a wide range of individuals
